Drug and Alcohol Prevention and Education Resources for Schools and Parents

Reducing Harm, Supporting Recovery

A health-led response to drug and alcohol use in Ireland 2017-2025

This resource was developed in recognition that adolescence and young adulthood are periods of risk taking and experimentation that often includes substance use.

Schools and colleges are important settings in which to reach young people.

This resource provides important links and signposting to substance use supports for parents, schools and students.

Department of Education

An Roinn Sláinte
Department of Health

Cognisant of the evidence base for substance use education and the circular; DATFs offer various levels of supports for post primary schools. The levels of intensity depends on their respective strategies and will range from low intensity (information leaflets, web links etc) to high intensity (bespoke training, in-school workshops for parents etc). The Covid-19 response has reduced the capacity of some DATFs because of redeployment and covid-19 related restrictions. It is therefore suggested that contact is made with the relevant DATF for your school if support is required so that you may establish the level of support that is available. A summary of the range of options is presented below.

Support 1: Capacity Building for Teachers

- Level 1: bespoke training for teachers
- Level 2: brief training in schools
- Level 3: dissemination of evidence-based resources, advice, meetings, e-learning
- Level 4: email and print information & advice

Support 2: Capacity Building for Parents

- Level 1: family support services and bespoke workshops
- Level 2: once off school workshop for parents
- Level 3: dissemination of evidence-based resources & advice via phone, meetings, e-learning
- Level 4: email and print information & advice

Support 3: Substance Use Policy assistance

- Level 1: workshop with school management to develop bespoke policy in line with national guidance
- Level 2: meeting & e-advice re development of policy including templates
- Level 3: email and print information and advice

Support 4: Signposting & supports

- Level 1: direct referrals into services for students that are struggling with substance use
- Level 2: contact numbers for referrals and information on process
- Level 3: email and print information & advice

Each DATF is different but most will offer at least level 4 in several categories.

OTHER KEY RESOURCES FOR SCHOOLS AND PARENTS

Know the score - evidence based resource for teachers

Know the Score is the first national evidence-based resource on alcohol and drugs for senior cycle students (15-18yrs), and is developed in partnership between public health and education professionals. The resource is aimed at engaging young people in topics including exploring risks associated with alcohol and drugs. Includes teachers manual, videos and other resources.
